| NodeJS..... | 3 |
| ExpressJS..... | 3 |
| Features..... | 3 |
| Prerequisites..... | 3 |
| Key Learning Outcomes..... | 3 |
| Course Curriculum..... | 4 |
| Lesson 01 - Introduction and Foundation..... | 4 |
| Introduction..... | 4 |
| The Node.js framework..... | 4 |
| Installing Node.js..... | 4 |
| Using Node.js to execute scripts..... | 4 |
| Lesson 02 - Node Projects..... | 4 |
| The Node Package Manager..... | 4 |
| Creating a small project..... | 4 |
| The package.json configuration file..... | 4 |
| Global vs. local package installation..... | 4 |
| Lesson 03 - Working with asynchronous programming..... | 4 |
| Asynchronous basics..... | 4 |
| Callback functions..... | 4 |
| Working with Promises..... | 4 |
| Advance promises..... | 4 |
| Using Request module to make api calls..... | 4 |
| Asynchronous Commands..... | 4 |
| Lesson 04 - Building a HTTP Server with NodeJS using HTTP APIs..... | 4 |
| The HTTP protocol..... | 4 |
| Building an HTTP server..... | 4 |
| Rendering a response..... | 5 |
| Processing query strings..... | 5 |
| Processing posted data..... | 5 |
| Building a HTTP Server with Node.JS using HTTP APIs..... | 5 |
| Lesson 05 - File System..... | 5 |
| Synchronous vs. asynchronous I/O..... | 5 |
| Path and directory operations..... | 5 |
| __dirname and __filename..... | 5 |
| Asynchronous file reads and writes..... | 5 |
| File System & Security..... | 5 |
| Lesson 06 - Buffers, Streams, and Events..... | 5 |
| Using buffers for binary data..... | 5 |
| Flowing vs. non-flowing streams..... | 5 |

| | |
|--|---|
| Streaming I/O from files and other sources..... | 5 |
| Processing streams asynchronously..... | 5 |
| File System and Security..... | 5 |
| Lesson 07 - Multi-Processing in NodeJS..... | 5 |
| Working with Child Process API..... | 5 |
| Working with Cluster API for multi-core servers..... | 5 |
| Multi-Processing..... | 5 |
| Lesson 08 - ExpressJS..... | 5 |
| The model-view-controller pattern - MVC..... | 5 |
| Defining Jade templates..... | 6 |
| Configuring Express..... | 6 |
| Postman configuration..... | 6 |
| Using REST..... | 6 |
| JSON Data..... | 6 |
| Reading POST data..... | 6 |
| CRUD operations..... | 6 |
| Adding middleware..... | 6 |
| Expressjs..... | 6 |
| Lesson 09 - Building a HTTP Server with NodeJS using..... | 6 |
| HTTP APIs..... | 6 |
| How Node.js connects to databases..... | 6 |
| RDBMS databases and NoSQL databases..... | 6 |
| Connecting to RDBMS and Mongodb databases..... | 6 |
| Performing CRUD operations..... | 6 |
| Express JS-CRUD..... | 6 |
| Lesson 10 - Socket.io, The Front-end, and A Chat App..... | 6 |
| Getting Started..... | 6 |
| Adding Socket.io To Your App..... | 6 |
| Exploring The Front-end..... | 6 |
| Sending Live Data Back & Forth..... | 6 |
| Creating The Front-end UI..... | 6 |
| Showing Messages In App..... | 7 |
| Working With Time..... | 7 |
| Timestamps..... | 7 |
| Show Message Time In Chat App..... | 7 |
| Chat application Project..... | 7 |
| SocketIO-Chat..... | 7 |
| Lesson 11 - Introduction to Task Managers with unit testing..... | 7 |
| Working with gulp..... | 7 |
| Working with grunt..... | 7 |
| Working with unit and E2E testing..... | 7 |
| gulp-grunt..... | 7 |
| Unit-testing-Jest..... | 7 |

Overview

This Node.js and Express.js crash course enables you to build network applications quickly and efficiently using JavaScript. The course also helps developers understand and build web applications with JavaScript

NodeJS

NodeJS is an open source, cross-platform runtime environment for executing JavaScript code. node is used extensively for server-side programming, making it possible for developers to use JavaScript for client-side and server-side code without needing to learn an additional language.

ExpressJS

Express is a commonly-used web framework that is useful for creating HTTP APIs (Request and Response Handling) and also for Parsing and Storing User Input.

Features

- Master Node.js, Socket.io, Express.js with MongoDB
- Quizzes at the end of chapters
- Real-life, industry-based projects

Prerequisites

- basic JavaScript
- basic HTML

Key Learning Outcomes

By the end of this interactive training, you will be able to:

- Install Node.js and execute scripts
- Build and implement HTTP server using APIs
- Use buffers for binary data and streaming I/O from files and other resources
- To work on Express.js with MongoDB and other packages

Course Curriculum

Lesson 01 - Introduction and Foundation

- *Introduction*
- *The Node.js framework*
- *Installing Node.js*
- *Using Node.js to execute scripts*

Lesson 02 - Node Projects

- *The Node Package Manager*
- *Creating a small project*
- *The package.json configuration file*
- *Global vs. local package installation*

Lesson 03 - Working with asynchronous programming

- *Asynchronous basics*
- *Callback functions*
- *Working with Promises*
- *Advance promises*
- *Using Request module to make api calls*
- *Asynchronous Commands*

Lesson 04 - Building a HTTP Server with NodeJS using HTTP APIs

- *The HTTP protocol*
- *Building an HTTP server*

- *Rendering a response*
- *Processing query strings*
- *Processing posted data*
- *Building a HTTP Server with Node.JS using HTTP APIs*

Lesson 05 - File System

- *Synchronous vs. asynchronous I/O*
- *Path and directory operations*
- *__dirname and __filename*
- *Asynchronous file reads and writes*
- *File System & Security*

Lesson 06 - Buffers, Streams, and Events

- *Using buffers for binary data*
- *Flowing vs. non-flowing streams*
- *Streaming I/O from files and other sources*
- *Processing streams asynchronously*
- *File System and Security*

Lesson 07 - Multi-Processing in NodeJS

- *Working with Child Process API*
- *Working with Cluster API for multi-core servers*
- *Multi-Processing*

Lesson 08 - ExpressJS

- *The model-view-controller pattern - MVC*

- *Defining Jade templates*
- *Configuring Express*
- *Postman configuration*
- *Using REST*
- *JSON Data*
- *Reading POST data*
- *CRUD operations*
- *Adding middleware*
- *Expressjs*

Lesson 09 - Building a HTTP Server with NodeJS using

- *HTTP APIs*
- *How Node.js connects to databases*
- *RDBMS databases and NoSQL databases*
- *Connecting to RDBMS and MongoDB databases*
- *Performing CRUD operations*
- *Express JS-CRUD*

Lesson 10 - Socket.io, The Front-end, and A Chat App

- *Getting Started*
- *Adding Socket.io To Your App*
- *Exploring The Front-end*
- *Sending Live Data Back & Forth*
- *Creating The Front-end UI*

- *Showing Messages In App*
- *Working With Time*
- *Timestamps*
- *Show Message Time In Chat App*
- *Chat application Project*
- *SocketIO-Chat*

Lesson 11 - Introduction to Task Managers with unit testing

- *Working with gulp*
- *Working with grunt*
- *Working with unit and E2E testing*
- *gulp-grunt*
- *Unit-testing-Jest*
